About Us

JYOTI Engineering Enterprises

Jyoti Engineering Enterprises is in the business of manufacturing, developing, trading and stockist of Industrial Refrigeration Systems and Equipment, Compressors, Valves, Controls and Spares. We have 24 years of experience as manufacturers of Industrial Refrigeration Systems and Equipment like Chilling Plants, Instant Water Cooled Chiller Systems, Screw Chiller Systems, Air Cooled Chiller Systems, Liquid Overfeed Systems, Compressors Remanufactured, etc. for Chemical, Pharmaceutical, Food Processing, Dairy and Construction industries.

24 YEARS OF EXPERIENCE

Infrastructure

We have two high-tech and well equipped manufacturing facilities, located right outside the city of Baroda, Gujarat, India in GIDC Nandesari from where we manufacture all our advanced Industrial Refrigeration Systems and transport them all across India and globally.
From these sites, we maintain the policy of delivering value to our customers through on-time delivery, product safety, reliability and Quality.

Vision

We at JEE, want to contribute in changing the face of Indian industry with building refrigeration systems of International standard by becoming a world class manufacturing and developing facility of refrigeration equipment.

Our Team

We at JEE, are a group of 30 skilled and efficient professionals including men and women that apply advanced technology, sophistication in operations and rigid testing parameters to deliver the best and hassle-free experience to our clients.

Our Products

JYOTI Engineering Enterprises

BRINE CHILLERS

Open type High capacity Chilling plants ranging from 5TR to 500TR at +30°C to (-40°C) (Brine), Ammonia or Freon Based.

RE-MANUFACTURED COMPRESSORS

Remanufactured compressors with jacket replacement, standard crankcase and refabricated bodywork with testing giving the best output as a brand new compressor.

BRINE CHILLERS

Open type High capacity Chilling plants ranging from 5TR to 500TR at +30°C to (-40°C) (Brine). Reciprocating compressors are used in this system with induction motors and either Shell & Tube or PHE condensers and chillers which are Fully Auto the PLC Panel controlled with VFD.
Application: • Chemical Processing • Pharmaceutical • Pharmaceutical Industries

AIR-COOLED CHILLERS

Boxed-up Air Cooled Chiller System ranging from +5°C to -20°C. Ammonia or Freon Based.

LIQUID OVERFEED SYSTEMS

Low-Pressure Liquid Pumping Systems which are Fully-Auto PLC Controlled Systems with single or Dual Skid Reciprocating Compressors and Liquid Ammonia Pump.
Application: Chemical, Pharmaceutical, Food Processing, Dairy Industries etc.

COMPRESSOR SPARES

Genuine Quality Compressor Spares for Kirloskar, Bitzer, Carrier, York, Grasso, Sabroe, Mycom, etc. as per OEM MOC and fitment.
